

STRUCTURAL ENGINEER (ASSOCIATE) Leeds, United Kingdom

About the Role:

An experienced structural engineer is required to take a key role in our expanding team. The successful applicant will be a competent building structures designer and must possess relevant Structural and/or Civil engineering qualifications.

You will be expected to act as the lead structural designer on a variety of building commissions. We're looking for someone who can make an immediate impact within a fast-moving environment, so you will bring a track record of successful project delivery and an excellent grasp of building design.

You will need to be able to develop and support engineers and technicians, to ensure the growth of your team and the business. An ability and desire to sell the organisation's consulting services, and win work for the company, is essential.

Responsibilities:

- Contribute and take responsibility for the execution of Structural projects
- Design and Project Manage multiple Structural commissions
- Supervise Senior Structural Engineers and AutoCAD Technicians
- Contribute to winning Structural commissions
- Prepare offers and bids
- Develop and expand the client base
- Client management and customer care
- Assist with resource allocation and expansion of the Structural team
- Mentor staff, advising on progression to IStructE or ICE Chartership

Requirements:

- Track record in Building Design, Project Management and Site Supervision
- Proven success in commission management
- Excellent report writing skills
- Strong client / business development skills
- Chartered membership of the Institute of Civil or Structural Engineers preferred
